

Agenda for the PBL Data Dive Sep 4 2013

Agenda for the day

09:30 - 10:00	Introduction	
	Introductions (Hackers)	5m
	Introductions (PBL)	5m
	Jonathan (Hacker): introduction	10m
	Johan (PBL) : introduction	10m
	present:	
	PBL Plenary group	
	PBL Core Data Group	
	HACK group	
10:00 - 11:00	Start the real work!	
	PBL code team : 5 min data pitches	
	Hack group : examine data, come up with ideas,	
	examine desires	
	present:	
	PBL Core Data Group	
	HACK group	
11:00 - 12:30 lunch	Hack group make a series of outline ideas for presentation at	
	present:	
	PBL Core Data Group	
	HACK group	
12:30 - 13:00	Lunch Recap	
	Hack group : present the ideas so far	10m
	Erik (Hacker) : geo formats	10m
	Comments and discussions	10m
	present:	
	PBL Plenary group	
	PBL Core Data Group	
	HACK group	
13:00 - 13:30	LUNCH	
13:30 - 15:45 group	Hack group to develop ideas together with PBL core data	
	present:	

PBL Core Data Group
HACK group

15:45 - 16:30 Hack group to prepare presentations on paper / flipboard

present:
HACK group

16:30 - 17:00 End of day recap - presentation of ideas and follow ups
Hack group : present the ideas so far 15m
Comments and discussions 10m
Action plan + wrap up 5m

present:
PBL Plenary group
PBL Core Data Group
HACK group

Groups

PBL Plenary group	- extended group from PBL
PBL Core Data Group	- core group available all day
HACK group	- The visiting "hackers"

Questions posed by PBL

- How do you hackaton winners search for data? On what grounds is data selected?

- The presentation of open data, for example using Tim Berners Lee's system
- how many stars do you need? When is data usable?
- We are interested in the use of geodata by app builders – how should it be presented, when is it usable?
- And off course anything you think is relevant for us to know.

notes

Thanks. All right, let's do it on Wednesday the 4th of September. I think we should meet or call early August to discuss the exact setting of the data dive. Based on your proposal in imagine a setting like this: in the morning we present ourselves, the PBL open data sets (both already open and due to be opened), while you and the participants ask questions etc, then we have lunch and after that you are in control: you get to ask questions and we dive in depth into the data, both technical and topical. And then Mean while the lady from Appsterdam makes sure everything goes as planned. Does that sound about right?
